

OXYMIX™ Oxygen/Air Mixer

A breath of fresh air in neonatal oxygen therapy

Effective, Low Cost, Oxygen Therapy

- Oxymix™ filters and blends room air with medical grade oxygen
- An oxygen/air mixer that doesn't require compressed air - big cost savings and more versatile than "blenders"
- Uses 80% less medical grade oxygen than Venturi mixers - huge cost savings versus Venturi

Accurate Oxygen Therapy

- Always delivers your requested mix [21% - 100%] at the optimum 8 litres/minute, the correct flow-rate for oxygen hoods and enclosures

Safe and Easy to Use

- Oxymix™ operates on mains power with a 5-hour battery backup for patient transport
- No complicated replacement parts
- Alarms built in for fan failure and filter replacement

Quiet and Versatile

- Oxymix™ is whisper quiet (unlike Venturi mixers) and will not disturb the patient
- Oxymix™ attaches directly to the oxygen hood and can be used with a humidifier
- Great for hospitals without piped air and for transport

Ordering Details

Oxymix™ Oxygen/Air Mixer OMX-001

One of the
lowest cost
and most
effective
oxygen/
air mixers
available
